Test	Error Type	Issue	Solution
Validator.w3.org	Error	Element div not allowed as child of element button in this context.	<p>The piece of code with this error was taken directly from: https://mdbootstrap.com/docs/jquery/navigation/hamburger-menu/</p> <p>An attempt was made to change the div element to a span, in order to satisfy W3C requirements, however the icon then didn't display</p>
jigsaw.w3.org/css-validator/validator	Warning	-webkit-backface-visibility is an unknown vendor extension -webkit-backface-visibility is an unknown vendor extension :-webkit-autofill is an unknown vendor extended pseudo-class -webkit-box-shadow is an unknown vendor extension -webkit-text-fill-color is an unknown vendor extension :-ms-input-placeholder is an unknown vendor extended pseudo-class ::-ms-input-placeholder is an unknown vendor extended pseudo-element	<p>No action – advice taken from: https://stackoverflow.com/questions/52490004/what-are-all-of-these-w3c-css-validation-warnings-about</p>
		Same color for background-color and border-top-color	In this case, the border colour and background colour are intended to be the same colour, so no action taken.
